

PlantStar 4.0 Virtual Server Specifications (as of 01/06/2022)

Minimum specs:

CPU: 8 vCPU

RAM: 16GB

Disk:

- 1TB

Recommended specs:

CPU: 12+ vCPU

RAM: 64GB

Disk:

- 1Tb SSD or U.2

- A secure VPN connection 24/7/365 for customer support is required. See (1)(3)
- SFTP / Agent based backup of PlantStar system and data is recommended. See (2)
- Only SYSCON provided software may be installed or running on the virtual server. Failure to comply with this stipulation may void the PlantStar warranty.

(1) If the customer does not provide a secure VPN connection for customer support and maintenance, additional support charges and maintenance contract may apply.

(2) The customer is responsible for the backup of the virtual server including the PlantStar OS and software. If an up-to-date backup is not available and the PlantStar OS and/or software must be reinstalled by PlantStar, an additional service charge may apply.

(3) VPN port requirements, minimum: 22, 80, 5432, 8888

22	SSH
80	Browser
5432	PostgreSQL
8888	Tornado Socket
