

PlantStar Dashboard Display

Display the PlantStar software through the customers facility with 43"-85" large screen monitors. The PlantStar software allows customers to set up groups of machines/equipment enabling them to display important real-time shop floor information in different areas of their facilities.

Interactive PlantStar Display

Touchscreen Available in 43"-85" Can be wall-mounted or hung overhead and used as mirror displays with standard HMI or as standalone display with a PlantStar mini-HMI. Allows customers to customize their Dashboard and make changes when needed.
