

HMI PEDESTAL

The PlantStar HMI pedestal provides an ideal mounting arrangement to facilitate operator interaction with the PlantStar Manufacturing Execution System. The pedestal can and should be bolted to the floor in a location convenient to each work center, allowing operators and set-up personnel easy access to job management, downtime, assist, and reject functions.

The versatile pedestal design allows for the use of a traditional PlantStar touchscreen HMI, standard tablet computers, as well as larger touchscreen displays if desired. Power, network, and signal wiring can be connected to the pedestal via rigid or flexible conduit and can be routed securely inside the pedestal column via a convenient access panel.

KEY FEATURES

- Compatible with SYSCON PlantStar Industrial HMIs.
- Accommodates 10"60" monitors with VESA mounting configuration
- Sturdy, Floor Standing Construction
- Integrated Cable Management System
- Meets ADA Height and Reach Standards

SPECIFICATIONS

- Overall 23"W x 46.5"H x 23"D
- Base 23"W x 2"H x 23"D
- Weight: 44 lbs.
- Steel Body with Rounded Corner Aluminum Enclosure
- Weighted Base provides Stability
